

A

```

AMPERunofficial ▶ python3 AMPERCLI.py
Please enter what simulation type you would like to run:
a)150MeV Proton
b)NSRL GCRSim
c)Deep Space
d)Gamma
a
Please enter radiation dose. Options are: 0, 2.5, 5, 10, 20, 30 Gy.
5
Please enter cell type:
a)Wild Type
b)rad51
b
Please enter ROS Model:
a)Basic ROS
b)Complex ROS

B

AMMPER
Agent-based Model for Microbial Populations Exposed to Radiation

Simulation Type

☒ 150MeV Proton ☐ NSRL GCRSim ☐ Deep Space ☐ Gamma

Radiation Dose (150 MeV Proton Only)

Slider: 0 to 30 Gy (Current value: 5 Gy)

Cell Type

☐ Wild Type ☒ rad51

ROS Model

☒ Basic ☐ Complex

Results

☐ Export data to .json file ☒ Display onscreen
